Worley

This is a full-time position based in Madrid office of a major international consultancy. We are looking for a dynamic, motivated junior hydrogeologist with strong technical and communications skills to work on complex site characterization and remediation international project. You will participate in a variety of office tasks related to planning, evaluating and implementing environmental investigations and remediation projects. You will learn from other experienced staff who are ready to mentor you.

The successful candidate will:

- Record and interpret geologic and hydrogeologic data, prepare works plans and technical reports
- Provide technical support by working in areas focus on groundwater resources, chemical hydrogeology, groundwater remediation and restoration, hydrogeological assessment and sustainability.
- Prepare data tables, potentiometric contour maps, isoconcentrations contour maps and cross-sections.
- Participate in and support business development activities including proposals.
- Participate in and support discussions with clients and regulatory personnel.

Qualifications:

- Bachelor’s degree in geology; Master’s degree in hydrogeology
- The successful candidate will have a minimum of 2 years’ experience in consulting hydrogeology, a high degree of computer literacy, good time management and flexibility.
- Experience in groundwater flow and transport modelling using MODFLOW, MODPATH and MT3D.
- Very good skills on Microsoft word excel and power point.
- Ability to present technical information, both written and spoken in a concise and professional manner.
- Excellent English communication and writing skills.
- Ability to learn new techniques, strong ability for multitasking, follow instructions, work independently and comply with the company policies.
